

# Ladybug, Ladybug

## Felt Finger Puppet Pattern

You will need:

- 1 Sheet of black felt
- 1 Sheet of red felt
- Hot glue gun
- Needle, black and white thread (optional)

1. Cut out all pieces, then arrange both ladybug sides as you like.
2. Hot glue spots onto wings on both ladybug sides. Hot glue wings onto body, making sure to mirror what both sides look like so the edges will match up when wrong sides are together.
3. Hot glue on the wrong side, just along the edge of one wingtip to the other, leaving the bottom black section open for puppet opening. Alternatively, you can blanket stitch around the outside of the wings and head, switching thread colors when you get to the head, then again when you get to the other wing.

For personal & classroom use only.
